

SIX SENSES

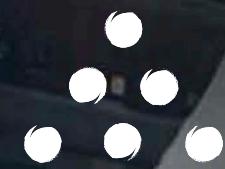

We Create Places that

RECONNECT PEOPLE

The Six Senses brand was born from the belief that to live is to connect. Experiencing true connection means detaching from life's distractions so that we can awaken our senses and open our hearts and minds to the truth of our feelings, each other, nature and the power of now.

Our enduring vision remains as strong as ever:

*To help people reconnect with themselves,
others and the world around them.*

Redefining

URBAN DEVELOPMENT

Translating our vision into an urban environment enables unique communities of residents, hotel guests and members to come together in iconic landmarks in the world's prime downtown addresses. Layered onto this are lifestyle opportunities, experiences and a level of hospitality and service that does not exist elsewhere.

ICONIC STRUCTURES AND HERITAGE FAÇADES

True to our name, what we really want to create is a sensory experience. Emotion is an important word for us. We collaborate with the most innovative experts in architecture, sustainable engineering, design, hospitality and development to embody each city's identity and history while applying creative freedom and courage to stand out and write the next chapter in its story.

Restoring Art Deco emporiums with columned façades to Belle Époque mansions and centuries-old palaces, for us, sustainability is not a place, it's a passion, a whole movement.

What emerges are spaces that are at the same time an epicenter and an escape, that harmonize the interior and exterior and that create vital and productive environments for guests and residents.

AUTHENTICITY IN THE CITY

Our urban residences, guest rooms and suites are designed with outstanding craftsmanship, comfort, natural materials and light in mind to ensure our hotel guests and residential communities find the right home. A place to feel happy, well and safe. A place to enjoy complete privacy yet seamless access to our community and the city on their doorstep.

Interiors

“The Whiteley represents a space for those people with discerning taste, who are making a conscious choice to live somewhere authentic.”

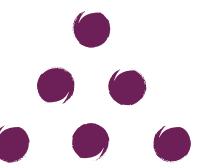

**Alex Michelin,
Finchatton**

CONCEPTUAL CUISINE TO SURPRISE AND DELIGHT

Nothing brings people together better than good food. That's why we mix centuries-old food cultures with our Eat With Six Senses philosophy incorporating local, seasonal and sustainable produce, often grown fresh in our own organic courtyard gardens or on the roof.

Every meal is an event. In collaboration with celebrity chefs, world-famous restaurateurs and founders of new cuisine concepts, we build unique relationships with diners so that we can feel their energy and feed it back to them in their food.

*“Without olive oil I would
leave the profession!”*

**Eyal Shani,
North, Six Senses Ibiza**

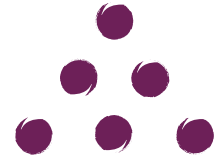

ALWAYS A WARM WELCOME

Soaring ceilings, sculptural features and a lush artisanal palette of natural materials add to the warm elegance of the space. Our brand philosophy of connection to people and nature is central to the convivial and biophilic tone throughout the lounges, open kitchens and courtyards whether talking to friends or the plants.

Showcasing history, local flavors and Six Senses touches, each is a beacon of inspiration for the urban premium hospitality and residential sector.

“Much thought is given to how lively and vibrant areas flow into stillness and serenity to offer energizing and restorative sensations; a perfectly balanced environment where positive energy can flow and possibilities can grow.”

Neil Jacobs, CEO

FINDING A PLACE TO BE

If Six Senses hotels and resorts are about getting away, Six Senses Place is where members come home in a convenient, comprehensive venue designed to become part of a natural daily routine.

It evolves the concept of the third place. As an antidote to modern isolation, Six Senses Place puts the “we” in “wellness” and makes self-care social, playful and life expanding without having to leave town. It also provides continuity for our signature wellness programs.

In urban locations with a residential element, residents will receive access to Six Senses Place, a beautiful ecosystem to encourage reflection, growth and reconnection.

“What allows us to shut our eyes and feel at peace? To be assured we are on the right path. To not take life too seriously and walk at ease through whatever curve balls life throws our way, with a smile on our face. To love life and let it love you back. Six Senses Place is just that. Something that holds us up and elevates to a higher state. To celebrate what is right here, right now.”

**Anna Bjurstam,
Wellness Pioneer, Six Senses**
