

SIX SENSES

We Create Places that

RECONNECT PEOPLE

The Six Senses brand was born from the belief that to live is to connect. Experiencing true connection means detaching from life's distractions so that we can awaken our senses and open our hearts and minds to the truth of our feelings, each other, nature and the power of now.

Our enduring vision remains as strong as ever:

*To help people reconnect with themselves, others
and the world around them.*

We're Going on

OUR OWN JOURNEY

As Six Senses expands, we consistently demonstrate that wellness and sustainability are at the heart of what we do. Our DNA can be successfully replicated across a broad property portfolio, from our original rustic vibe to edgy design and urban splendor.

That's because, with Six Senses, reconnection can happen anywhere: on a remote private island, snowy mountain hideaway, desert dune, lush forest, rugged tundra, wine estate or in the middle of a lively lounge in the city.

We're Getting Up to New Things and it's

ALWAYS EXTRAORDINARY

From our resorts to our hotels, spas, residences and sanctuaries, together, they help people rediscover their joy of travel, rewild their inner child, feel part of a community, tap into positive energy, sleep like a contented cat, eat nourishing food, and encounter something unexpected.

Many things come together in serendipity: ancient wisdom, avant-garde design, pioneering science, trusted experts, homegrown food, care for our communities and ecologies. Wherever and however people encounter us - and whether they spend an hour or a season - our aim is for them to leave us in a better place than when they arrived.

That's the beauty of our brand.

Through

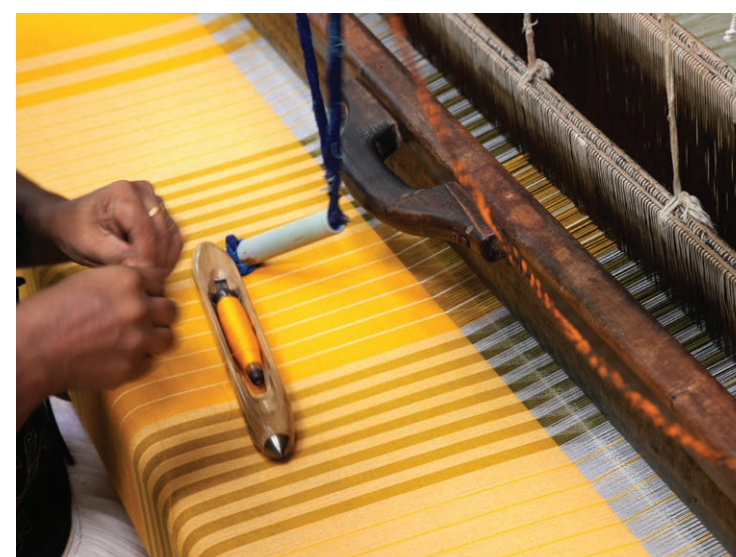

COMMUNITY

In our humble way, we can say that we bring a Six Senses community to our spaces and places. This reflects our emotional hospitality and the way we combine the natural magic of each location – whether a city block, fort, island villa, finca or quinta – with our optimistic and compassionate attitude to everyone.

Through
LOCALITY

While maintaining a global outlook, we are rooted in local concerns and cultures. Our operations work with artisans, farmers, producers and suppliers who live nearby. Our guests don't just observe local culture, they immerse in it, and ultimately become part of it.

Through

CURIOSITY

Fun and quirky aren't values you would ordinarily associate with the hospitality and wellness business. Our curiosity and desire to explore allow us and our guests to discover unexpected ways to reconnect every single day.

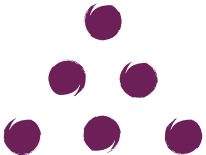

Through “Pinch Me, Did That Just Happen?”

MOMENTS

It isn't what you do but how you feel about it that makes the difference. From fire circles to feasts or fashion weeks, chanting with monks or close encounters with wildlife, there are many ways to stimulate, energize and restore.

Through

SCIENCE, SPIRIT AND CONNECTION FOR THE BODY, MIND AND SOUL

Our unique wellness experience that blends ancient health wisdoms with groundbreaking biohack technology. We don't follow the fads but do our own research to pioneer signature standards, wellness programs (sleep, nutrition, longevity, movement, energy medicine and alternative therapies) and longer-stay immersions.

And, What Can We Say, Through

LOVE

We are thoughtful about what we are doing and why, and how we impact our physical world and those around us.

Sustainable properties call for extraordinary creativity and design, they need to be good quality and they need to be made from exceptional materials. Far from being a barrier, taking an ecological and sustainable approach to our developments and operations adds meaning, drives innovation, enhances local socio-economic development and creates a hospitality offering that our guests trust and love.

TOGETHER WE EAT

Our chefs are guided by the principles of natural ingredients, local and sustainable and less is more – filling up on hearty, healthy and homegrown menus and removing the bad stuff from our dishes and plastic and waste from our kitchens.

WITH SIX SENSES

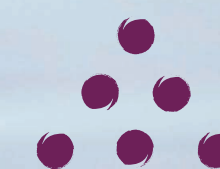

TOGETHER WE SLEEP

Because the importance of sleep goes way beyond just banishing under-eye circles, we've worked with internationally renowned experts including Sleep Doctor Michael J. Breus to bring together some of the best sleeping tools. From handmade mattresses and temperature regulating bedding to organic cotton sheets, sleep apps and more, we provide ideal conditions for a restful slumber while at Six Senses, and share additional knowledge for restorative sleep back home.

WITH SIX SENSES

Grow
WITH SIX SENSES

TOGETHER WE GROW

Our children's activities promote positive well-being by incorporating the six dimensions of wellness: social, environmental, physical, spiritual, emotional and intellectual. From flying yoga and cooking workshops to yoga, spa treatments, upcycling, arts and crafts, the focus is switching off the devices and switching on the fun.

TOGETHER WE GO DEEPER

Wellness is overused and everyone claims to do well in this space, but Six Senses is the most authentic, integrating it into every aspect of the guest's stay. If they wish to gain deeper insights, our biomarker analysis, movement efficiency testing, sleep tracking and skin analysis enables our experts to recommend a personalized program that may include spa treatments, nutrition, fitness, anti-aging and brain health activities to deliver wellness from the inside out and outside in.

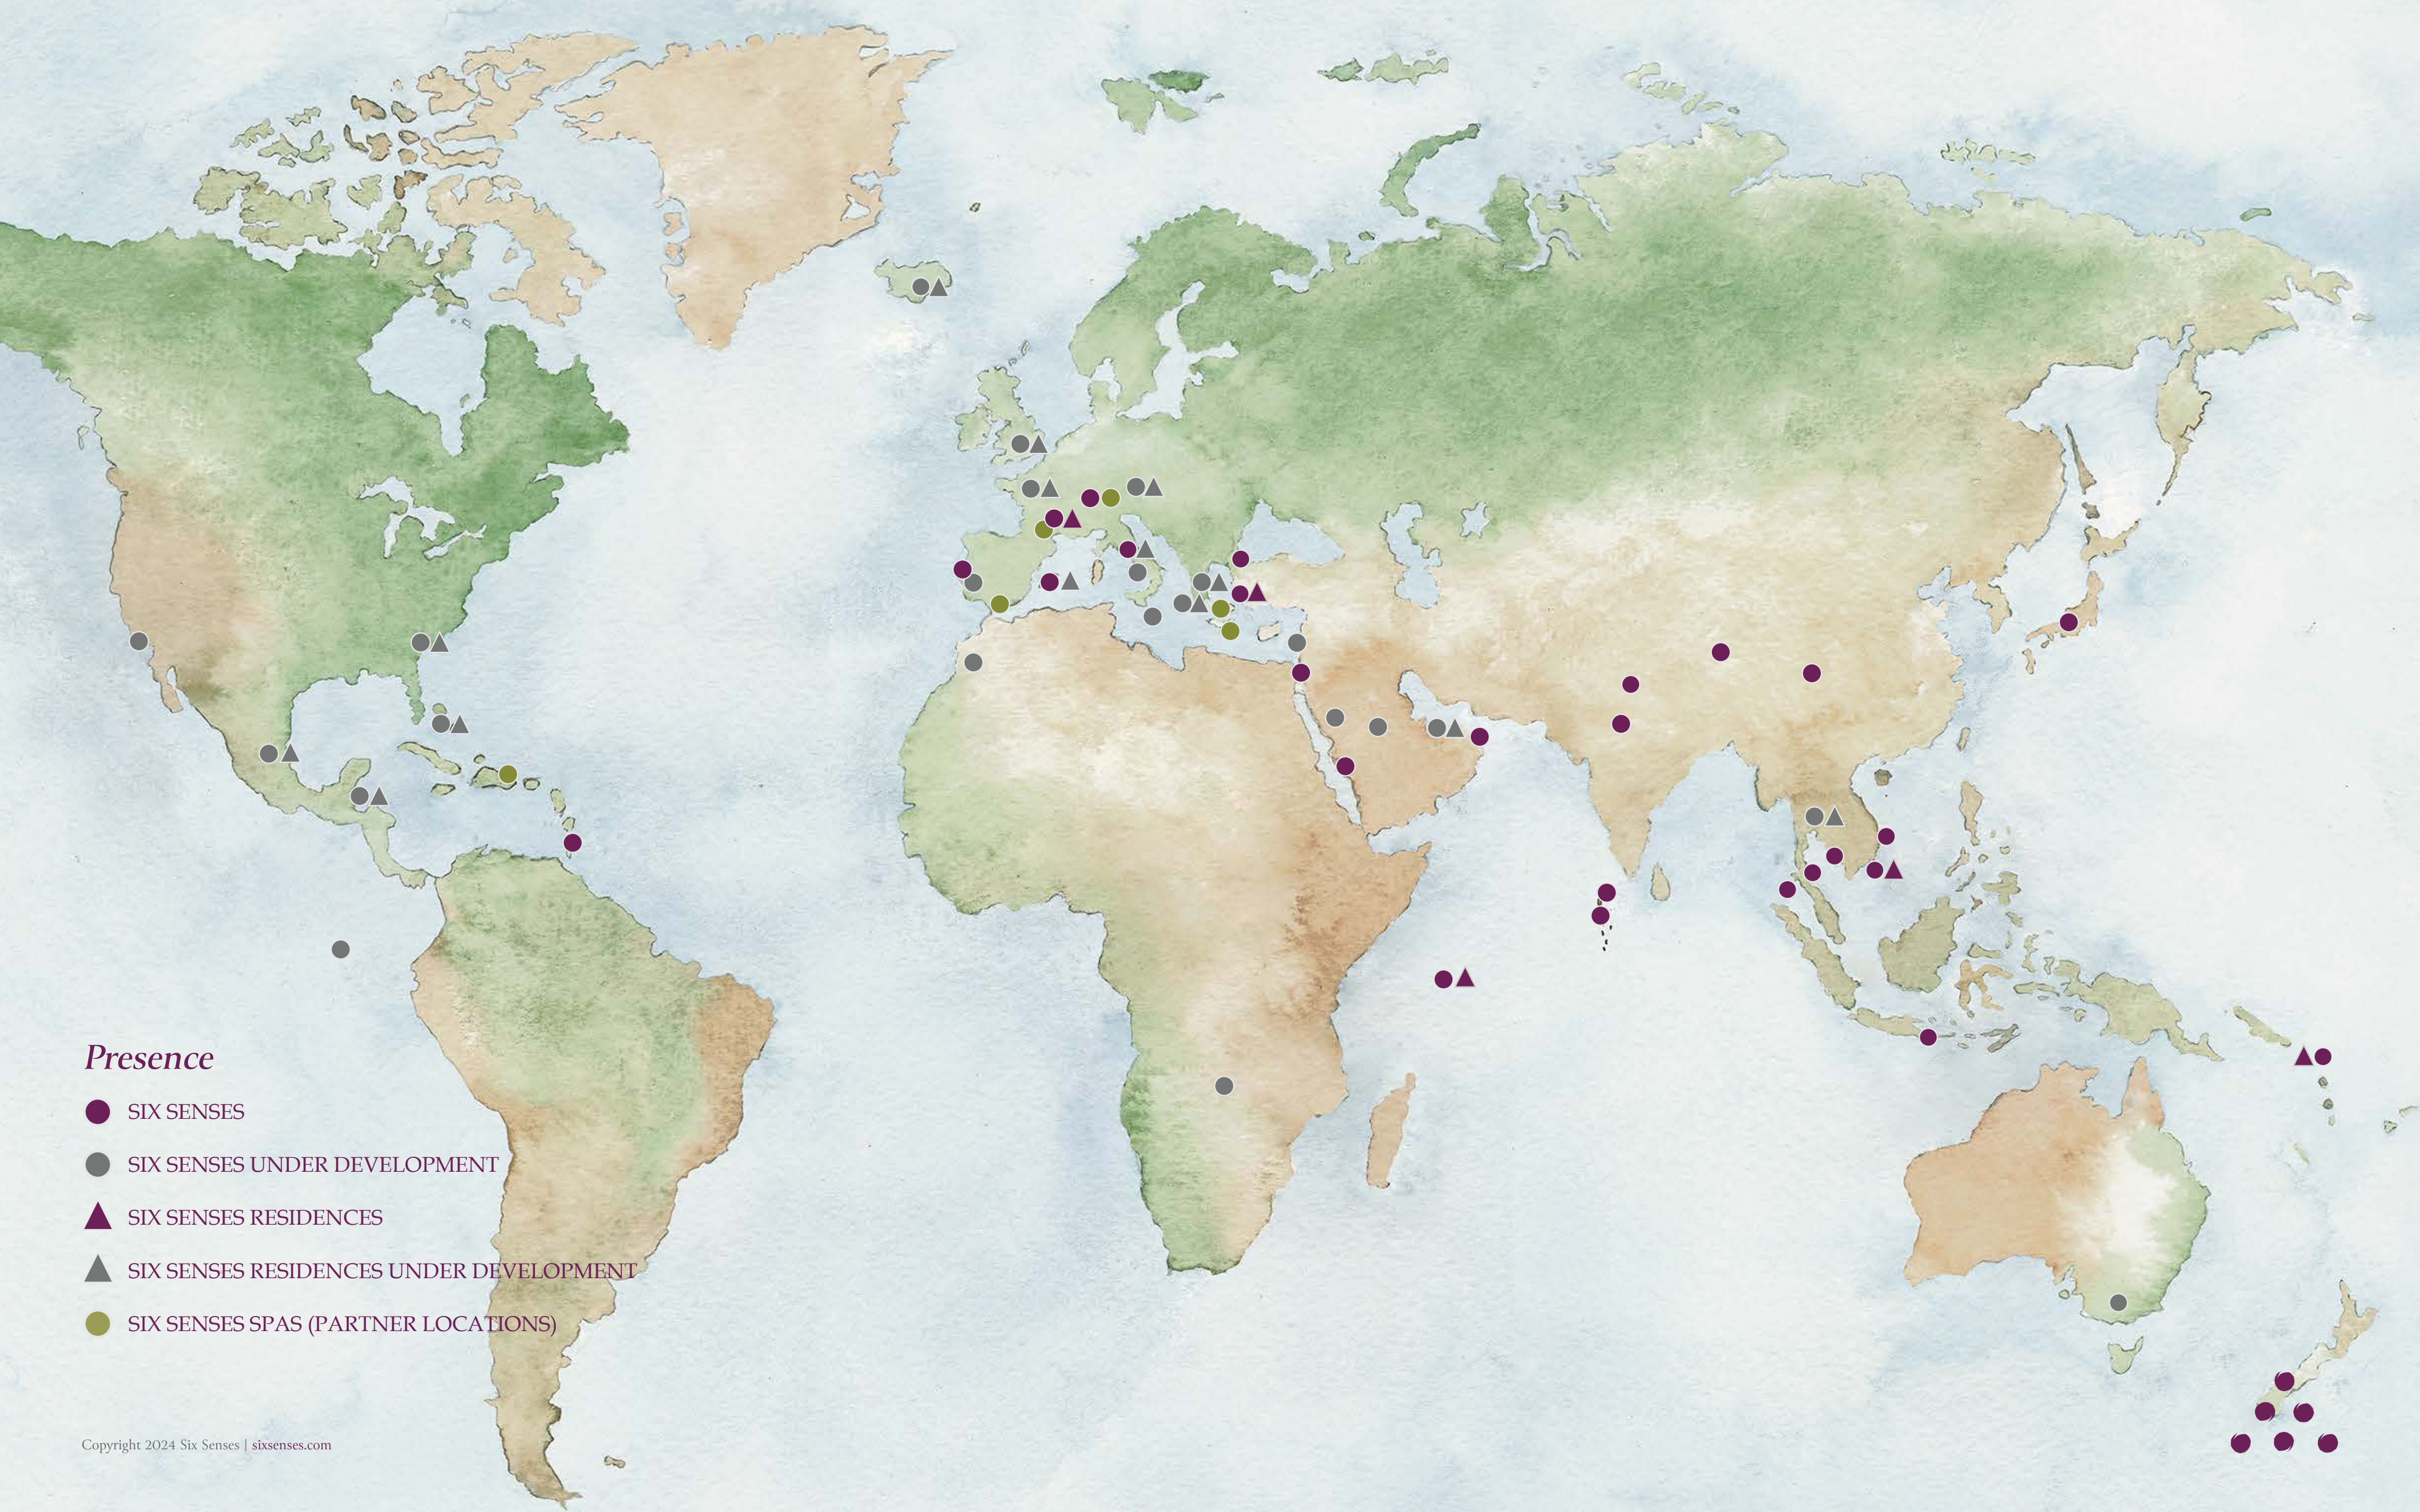

TOGETHER WE FIND A PLACE TO BE

If Six Senses hotels and resorts are about getting away, Six Senses Place is where you come home to being yourself in a convenient, comprehensive venue designed to become part of a natural daily routine.

It evolves the concept of the third place where people can belong to a feel-good, compassionate and inclusive community of advocates who care about the world and want to make their place in it more meaningful.

As an antidote to modern isolation and post-pandemic trauma, Six Senses Place puts the “we” in “wellness” and makes self-care social, playful and life expanding without having to leave town.
